

**EDEN<sup>®</sup>**

## WELCOME TO EDEN

---

Since the 1970's EDEN has produced electronic equipment, amplifiers and speaker cabinets that have been designed to provide musicians with the best in sound re-enforcement. In the early 1980's EDEN began to specialize in the world of bass amplification and through years of innovation and dedication the EDEN team have developed amplifiers and speaker enclosures that deliver to the highest standards without compromise.

EDEN cabinets can be found not only on the stages of some of the world's biggest festivals and concerts but also in the recording studios and homes of some of the most talented bass players and recording artists of the world. All of our speaker cabinets are designed to deliver maximum tone and are constructed using cabinetry techniques that provide the maximum rigidity and durability meaning not only that you achieve the best tone, but it is tone that lasts.

EDEN professional amplifiers are designed specifically for bass players. The amplifiers are not simply modified guitar amplifiers, they are the tools for professional bass musicians. Everything from our flexible EQ stages, preamp circuits and DI circuitry is all tailored to provide tone clarity and flexibility that means you can always find the setting you are looking for. EDEN professional amplifiers are also classified at 1% distortion, which means you have access to every single Watt of power, without unwanted distortion in your tone! You will notice the power difference with an EDEN. Now you can even get your EDEN tone straight into the front of house or DAW system with the brand new WTDI pedal!

EDEN is proud to announce that it is now part of the Marshall Amplification Group. As a leading force in Bass Amplification, we believe this new partnership will not only allow EDEN to offer the best customer service and product support but provide EDEN the opportunity to develop new and exciting technologies that benefit musicians everywhere. Everyone at EDEN would like to thank Jim Marshall for supporting the company and providing this fantastic opportunity.

The images and references to products shown in this catalogue were correct at the time of going to print. Due to our programme of continuous improvement and improvement to specification of product images shown may be subject to change in relation to actual product.

*With EDEN you can truly take your  
Bass playing potential anywhere.*

# WORLD TOUR CLASSIC SERIES

*Try a WTDI today to experience  
why it is becoming one of the  
fastest selling Bass pedals!*

## **WTDI**

The WTDI from Eden, now you can take your Eden tone anywhere.

Unlike other DI boxes the WTDI embraces the powerful tonal shaping and control that only Eden can provide and delivers it in a super compact DI pedal. Whether it's for the home studio, professional studio, live stage work or simply as a backup for your touring rig, you simply cannot afford to be without this simple yet effective tool that takes the concept of DI boxes to the next level!

Featuring all of the great functions you should expect from a great Bass DI pedal. The WTDI is not only a way of connecting your instrument to a mixing console, recording rig or power amp, it also has professional tone shaping features, the famous Eden "Enhance" control and even an onboard compressor.

## WORLD TOUR OVERVIEW

### *Bass Amplifiers with proven World Tour credentials.*

With its unmistakable looks and control layout, the world tour range is the promise that EDEN created when it first started providing Bass Amplifiers. The world tour range offers tonal clarity craved by studio players and live artists alike. With its rackmount-able metal chassis format every world tour amp can easily be integrated into a touring or studio rack and be integrated seamlessly with the rest of your rig.

All world tour amplifiers are built using military style modular construction techniques and specifically selected components, offering only the best durability and longevity in the field.

If you are serious about a touring bass rig that offers great tone, or want a piece of studio install gear you can rely on time and time again look no further than an EDEN world tour amplifier. Try one today to find out why EDEN represents the perfect choice for Bass.

The key to achieving the best tone from your Bass rig is to ensure that every element from the instrument through to the speaker cabinet is capable of delivering to the best of its ability. The best cabinets and most powerful amplifiers won't save your tone if your preamp isn't up to the job, and for the Bass, having the right flexibility in the right places is paramount to achieving this.

# PREAMP PERFECTION

## WP100

The WP100 offers not only fantastic tone capabilities but also a selection of the features useful in a professional environment. A Tube with preamplifier stage offering truly hi-fi augmentation of the instrument signal feeding a studio quality compressor complete with threshold and ratio controls, 5 bands of EQ with Tuner Mute and Turbo Boost features, the WP100 is the serious players preamp. The true original EDEN professional Preamplifier! Combine with any Bass power amplifier or plug straight into the front of house for unrivalled performance tone.

## WT800

Integrated professional Bass amplifier system. Take the WP100 preamplifier unit and tailor it to become a portable and powerful stage tool. The World Tour WT800 takes the great tone and performance of an EDEN preamplifier and combines it with awesome power capabilities to deliver a serious stage tool, time tested and proven worldwide. This amplifier operates between 330W per channel up to 1100W in bridged mode. EDEN highly recommends using D-series professional speaker cabinets with this product for optimal performance.

## WT550

Power and Portability with stacks of EDEN tone. The Traveller WT550 is simply one of the most portable pro level bass rigs. With the same detailed EQ shaping facilities as the WT800 and the WP100 preamplifier the WT550 allows you to take your tone everywhere. With its integrated tube preamplifier the WT550 offers great warmth of tone and flexibility in a compact package. Please note this amplifier operates between 300W per channel up to 750W dependant on your selected cabinet impedance. Please check against your speaker cabinet choice to establish the operational power output capabilities with your equipment. EDEN highly recommends using D-series professional speaker cabinets with this product for optimal performance.

## D-SERIES CABINETS

# D-SERIES CABINETS

### *The perfect stand alone cabinet.*

Many Bass players will tell you that the quality of their speaker cabinets is the reason that their tone sounds so good. D-series Cabinets are all about providing unrivalled performance without compromise.

Manufactured in Kentucky USA and using EDEN designed and engineered speakers made in the USA by Eminence, these cabinets are totally authentic. Designed to be super responsive, D-series cabinets not only move immense amounts of air to provide powerful response but they also do it quickly. These carefully designed and executed cabinet structures coupled with speakers tuned specifically for the job mean that you can hear high quality definition in your sound that many other cabinets simply cannot provide.

All D-series cabinets have our EDEN crossover control feature on the rear of the cabinet allowing you even more flexibility when dialling in your tone, maximizing the potential of the cabinet and allowing you full use of the custom designed high-grade cast tweeter horn\*, which is featured on all cabinets in the range.

Not only do EDEN cabinets perform to expectation but they are also crafted using time honoured production techniques using select materials. All of our D-series cabinets are made in Kentucky under strict quality control to ensure that each and everyone arrives with you in perfect condition. To achieve the best from your playing choose a D-series cabinet and don't compromise on tone.

\*Cast Metal original horns return to Eden D series cabinets for 2012!

# D-SERIES XLT CABINETS

Crafted in the USA and Designed to offer all the low end punch you will need. The XLT speaker cabinet provides an unmistakable growling bass response and signature mid range detail while still retaining definition to ensure that your sound does not get lost in the mix. XLT cabinets are touring standard quality with construction that is more than capable of standing up to rigorous demands of even the most prolific gigging musician. Every cabinet is constructed from AA void-free Baltic birch plywood with internal bracing to keep your tone focused and is built using traditional jointing techniques to ensure continuous reliability. XLT cabinets are ported and tuned to ensure that their EDEN designed made in the USA Eminence loudspeakers can work to their full potential providing you with unrivalled EDEN tone.

*Perfect for a  
variety of venues.*

## **D410XLT**

The optimal cabinet choice for a variety of situations.

Big enough to shake the room but still small enough for musicians who routinely find themselves playing larger bars and small clubs the D410XLT is the perfect stand alone cabinet for use in a variety of venues. As with our entire speaker cabinet products the D410XLT can be combined with other cabinets to enable you to tailor your sound, but for many the D410XLT with its top and bottom ported design is the go-to cabinet.

The 410XLT like all other D-series cabinets has been designed with a professional players needs in mind, try one today.

## D-SERIES XLT CABINETS

# D-SERIES XLT CABINETS

*Delivering great tone  
in a portable package.*

### D210XLT

Delivering great tone on a more portable platform than its larger 4x10" brother, the D210XLT is capable of deceptively responsive and powerful performance. Ideal for small venues and for rehearsal the D210XLT is also perfect when combined with either the D410XLT or D115XLT to provide a customizable sound experience.

*Immense  
bottom end power.*

### D115XLT

For those looking to have immense bottom end power without losing definition of their sound the D115XLT provides a great choice. The EDEN 15" loudspeaker is capable of delivering the type of low and dirty rumble you would expect from a larger cone size. However, with its tuned and ported cabinet design and Aluminium horn, the D115XLT isn't limited by the restrictions that 15" speakers traditionally encounter. The D115XLT is flexible enough to be used as a stand-alone cabinet as well as added bottom edge for a larger rig!

# D-SERIES XT CABINETS

XT Speaker cabinets took the overriding principles of our D-series speaker enclosures and tuned them to provide a more open and defined sound experience. With a deeper bottom end that is more focused and a smoothed mid range these cabinets are the perfect option for players that are looking for clarity and a hi-fidelity style tone experience. All our D-series XT speaker cabinets are manufactured in the USA using the highest quality materials and construction techniques. Like all Eden D series cabinets every XT Cabinet is loaded with EDEN designed USA Manufactured Eminence loudspeakers, which means that the D-series XT is the real deal.

*The ultimate all in one  
speaker cabinet solution.*

## **D810XT (The Big Rig)**

There is no mistaking the full touring rig setup preferred by touring artists and there is no mistaking the sheer overwhelming scale and power of the D810XT. Standing tall this cabinet is simply the ultimate all in one speaker cabinet solution. Constructed from furniture grade birch plywood the D810XT is finished with all of the care of quality and attention to detail you would expect from a pro grade speaker enclosure. The Cabinet is a logical marriage of both the D410XST and D410XLT cabinets. This combination means that you have a combination of both cabinets strengths combined in a single unit.

For those who are serious about their rig the D810XT is a commitment to your bass tone you will never forget.

## D-SERIES XST CABINETS

# D-SERIES XST CABINETS

### **D610XST (The Little Big Rig)**

6x10" speakers is big enough to rock the room, but still smaller than an all out 8x10" behemoth. D610XST represents a cabinet which is a great choice for professional musicians who need more than the traditional mid size enclosure and the D610XST delivers. With tight focused bass and mid's add to that EDEN's cast bell tweeter horn and horn level control the D610XST is a great stand-alone rig capable of holding its own against many of the larger cabinets offered in the market.

*Big enough to  
rock the room.*

### **D410XST**

The staple choice for bass players looking for a professional cabinet capable of playing in a variety of situations. With its 4x10" speaker layout and bottom ported design the XST 4x10" cabinet offers great focussed tone with exceptional clarity. The perfect option when you need a sound that projects and holds enough bottom end to drive your sound forward. The D410XST can easily be combined with an additional D-series cabinet to extend both its power handling or to fine-tune your cabinet tone requirements.

*Capable of playing in a  
variety of situations.*

# D-SERIES XST CABINETS

## D210XST

Loud enough to be heard and yet still small enough to be used at home or in a small studio. The D210XST offers more bottom end than the D210XLT cabinet yet with its cleverly designed cabinet construction and speaker selection still retains the focus of mid range and treble frequencies you need to cut through the mix and capture the intricacies of your playing style. The D210XST is a capable performance rig in its own right but for those players who like to combine different cabinets or have a more flexible rig the cabinet is easily combined with other XST or XLT cabinets.

*Perfect for  
home or studio.*

## NEW! D212XST

12" speaker cabinets are not something you traditionally associate with Bass. However EDEN has a history of producing 12" format speaker cabinets and with its experience in cabinet design this new 2x12" format cabinet offers the opportunity to explore a different tone and feel while still retaining a relevance to the needs of a bass player. The 12" loudspeaker produces a more aggressive and less focused overall tone and because its cone surface area is larger than a 2x10" the low end is increased while still retaining more definition than a single 15" cabinet. With its cast tweeter horn you still have the flexibility to dial in the definition you need when you need it. A great cabinet choice for players looking for a stand-alone small sized enclosure that offers a less restrained overall tone than other cabinets in its class.

*Increased  
low end.*

## NEW! D112XST

For players looking for a super portable extension cabinet the new D112 XST delivers a flexible take anywhere solution. Delivering a tone and feel between 1x10" and a 1x15" cabinet the D112XST delivers on the EDEN promise to never compromise. Instead of having to mix two different configuration cabinets to get the sound you are looking for the D112XST allows you to get what you want in a single, easy to handle package. As well as being more aggressive than many other cabinets on the market the EDEN cast tweeter horn and level control means that you can fine-tune your tone just how you like it.

*Never  
Compromise!*

## WTX SERIES

### *A true performance Thoroughbred.*

Like a finely tuned machine WTX amplifiers offer fantastic power output using modern technology to reduce weight and size. WTX is a true performance thoroughbred.

WTX amplifiers offer not only true EDEN tone, they also take the promise of the EDEN Traveller to the next level. More portable, flexible and lightweight, a WTX amplifier delivers amazing power output yet is so lightweight that it can simply be packed into your instrument bag and carried around with you.

The small size of these amplifiers doesn't restrict their functionality either; with multi function controls the WTX offers a full range of tone shaping and enhancing features too!

The promise of being able to take your tone with you wherever you go has never been more true, and because EDEN only uses the best construction techniques and high-grade components WTX amps are built to last. Check out a WTX integrated amplifier today to see just why so many bass players rely on EDEN for their sound.

# WTX SERIES

## WTX500

At 4.3 lb's (less than 2 Kg) the WTX500 is the true original lightweight bass amplifier. Not only is this little amp easy to transport, but with a maximum power output of 500W at 4Ω, this amplifier is more than capable of holding its own in a live band situation. So while the rest of the band struggles to set their gear up and drag flight cases in from the van, you can simply take the WTX500 out from your gig bag and either plug into a cabinet or use the DI output and go straight into the front of house!

The WTX500 is, simply put, the go anywhere professional integrated bass amplifier.

*Super easy  
to transport.*

BACK

## WTX264

For those players looking for professional bass tone in a super portable package but don't need the awesome 500W of pure power of its bigger brother, the WTX264 offers the perfect solution. A great amplifier for those looking to play smaller sized venues or have something that is perfect for rehearsals and studio work the WTX264 is a superlative choice.

The WTX264 still delivers up to 300W of output power so don't let its size fool you!

*Don't let the  
size fool you.*

BACK

## GIG READY GIG READY

EGRW264

*Great value by  
buying the  
two together.*

EGRW1264

### Combo Packs

Looking for a professional level portable rig in a simple no-nonsense package look no further than WTX bundled combo pack deals.

Of course you can buy these amplifiers and speaker cabinets separately, but with these bundled deals you can get great value by buying the two together with included gig bag. Both combo packs feature the lightweight and super portable WTX264 amplifier unit and either our EX110 Speaker cabinet, or EX112 unit.

# EDEN E-SERIES

## E-Series Amplifiers

Easy to use reliable no-nonsense tools for the bass player.

For Bass players that want a simple no-nonsense amplifier that offers the kind of features you need to go out and play the E-series amplifier provides a great choice. An intuitive layout means that even with no experience the E-300 and E-500 integrated bass amplifiers are both simple to control straight out of the box. Featuring Preamp Gain and the EDEN enhance control along with an easy to use 3 band EQ finding the tone you want doesn't have to be difficult.

Eden E-series amplifiers have been designed to deliver maximum power with minimal distortion which means an Eden E-series Amp will give other amplifiers with the same proclaimed power output a serious run for their money!

E-series amplifiers are also flexible too, you can put additional signals through the amp via either the Auxiliary 1/4 (6.35mm) jack socket input or 1/8 (3.5mm) line input socket, and you can take your signal straight from the amplifier to run straight into a desk or recording console using the XLR balanced output!

*Gig ready  
easy to navigate.*

### E300

Gig ready easy to navigate Bass amplifier designed to deliver great tone. Designed to provide a no-nonsense backline amplifier that can be relied on time after time. Constructed in Metal chassis for long life and durability, using tested production techniques and internal components to provide an amplifier worthy of the EDEN name. E-series heads also feature the EDEN enhance control feature, adding the ability to shape your tone even further than other amplifiers.

BACK

## E-Series Cabinets

E-Series Cabinets represent not only fantastic tone but also affordability. Designed by EDEN to provide tonal clarity and powerful sound projection the E-series provide an option for Bass players who are looking for a speaker cabinet that is durable and can withstand being on the road when required.

Every part of EDEN's expertise has gone into designing a cabinet range that is designed to offer performance ready and reliable loudspeaker cabinets that provides the kind of tone that is needed to cut through the mix and retain every element of your playing style.

## EDEN EX-SERIES CABINETS

### EX410 and EX410SC

For many bass players who are looking for a workhorse cabinet that is perfect for both rehearsals and live performances the 4x10" speaker cabinet is predominantly the first port of call. Big enough to be noticed a 410 cabinet also possesses the ability to cover just about all of the regular tone requirements a Bass player may need.

The EX410 and EX410SC cabinets are both relatively compact for a 4x10" configuration cabinet and possess the kind of features you expect from an EDEN designed enclosure.

The EX410SC offers the same compact size but with extended range speakers to enhance the upper mids and highs instead of using a horn.

EX410

EX410SC

*Perfect for  
rehearsals and  
performances.*

*A great  
punchy sound.*

### NEW! EX210

Now available in the E-series cabinet range the EX210. A very compact 2x10" cabinet with a great punchy sound. The cabinet design ensures that the 2x10" loudspeakers can deliver a surprising amount of bottom end. Even in such a small enclosure the overall tone is packed with clarity. The addition of a Tweeter horn with a level control means that the cabinet can be further tuned to bring in more definition to the higher frequencies.

# EDEN EX-SERIES CABINETS

## EX110

Exceptionally compact Bass Speaker cabinet in a lightweight design. This super portable has a built in carry handle yet it can handle a massive 300W of power! For those who have limited space to rehearse, want to practice at home or want to combine 2 cabinets the EX110 will surprise even the most experienced musicians with its power handling and exceptional tone qualities.

*Lightweight  
design.*

## EX112

The EDEN motto, Never Compromise! And the EX112 means that you don't have to. 12" format Bass cabinets are an EDEN speciality and the EX112 is no exception. For players that are looking for a compact cabinet that has more aggression and warmth than a 10" speaker alone can offer, but more control than a 15" cone, the EX112 provides the perfect solution. Ported cabinet design benefits overall tone clarity for a great sound.

*Never  
Compromise!*

## NEW! EX115

With its EDEN designed 15" speaker the EX115 is the largest single cone speaker cabinet in the E series range. While less portable than the 12 and 10" versions the EX115 makes up for this with sheer power of tone. The larger surface area coupled with the larger cabinet sizes allows the cabinet to move more air and benefits the sound with a large amount of bottom end. A great addition to your existing bass rig, or as a standalone cabinet when looking for some serious bottom end.

*Sheer  
power!*

# METROMIX SERIES AMPLIFIERS

## METROMIX SERIES AMPLIFIERS

Metro Mix amplifiers provide the ability for multiple instruments to be used at once and with their multiple headphone output ability these simple to use amplifier combos provide amplification for a variety of situations. What is more, the Hi-fidelity style tone shaping of Metro Mix amplifiers means that these multi purpose units are capable of handling not only bass, keyboard, electronic drums and vocal requirements but they can be used to jam along with pre-recorded backing tracks perfect for the one man band as well.

Why? Bass amplification is about as close as you can get to high-end audio sound re-enforcement. Unlike Guitar amplifiers that mainly rely on heavy colouration from both the preamp and power amp stages Bass amplification relies on overall clarity of tone. Through careful design EDEN Metro Mix combos provide the ability to use multiple inputs and still achieve clear great sounding sound for all signals that are fed into the unit!

*Perfect for jam sessions, small space rehearsals  
or even the classroom.*

### EM275

The most comprehensive Metro Mix amplifier in the range the EM275 not only provides serious performance volume with its stereo 2x75W power outputs but it also has extended capabilities making it suitable for small group performances.

The EM275 provides the ability to input up to 4 separate instrument or line inputs (inputs 3 and 4 share controls) and with its stereo input the EM275 is also suitable for use with Electronic drum kits as well. Even with its more powerful output the EM275 still retains headphone outputs (3 in total) so that you still have the ability to practice in private.

# METROMIX SERIES AMPLIFIERS

## EM25

With more power and flexibility than the EM15 the EM25 still allows you to plug in 2 separate instruments but provides the ability to play at a much louder volume, perfect for performing in smaller spaces. In addition each instrument input has its own gain control and an extended master amplifier section allows fine tuning using a 3 band equalisation stage and master volume setting. The EM25 can also send a signal out which means you can also record performances or take the signal into a sound desk, perfect when you want to use multiple EM25 units for larger group performances.

*Perfect for  
smaller gigs.*

## EM15

The smallest most portable Metro Mix amplifier. Perfect for 2 people to practice together either amplified through the units built in speaker or silently using the separate headphone outputs. Also the EM15 has a 1/8" (3.5mm) line input so you can jam along with MP3 tracks straight from your player.

The EM15 is also great for music class or education on a one to one basis providing full control through just one simple to use little unit.

*More than a single  
portable amplifier.*

# EDEN SPEAKERS

*Eden professional  
D series speakers  
proudly made in the USA!*

Hand made in Kentucky USA our D-series cabinets and speakers are true to the original promise of, best quality with no compromise.

Our USA made speakers are made to Eden's original exacting specifications by the worlds leading loudspeaker manufacturer Eminence, just a short car ride away from where they are carefully hand loaded into our cabinets!

EDEN has since its very inception never compromised on tone. In order to ensure its speaker cabinets gave the best performance EDEN designed its own speaker units, carefully shaping the tonal qualities and ensuring that every one provided the best sound solution.

To this day EDEN still use their own custom designed loudspeakers.

Now Manufactured in Kentucky USA for EDEN by leading speaker manufacturer Eminence you can buy these EDEN speakers for yourself\*.

\*Eden Designed USA manufactured speakers available separately. Replacement Speakers for non USA manufactured speakers and speakers not shown on this page available via authorised EDEN service centres, or EDEN distributors by request.

**D610XST** • 6Ω impedance • 6 x10" speaker configuration • 1500W power handling capability • Cast Horn Driver and Bell Casing • Tweeter level control • USA manufactured Cabinetry • Durable Cabinet covering • Internal Cabinet bracing promotes superior tone quality and sound projection • Custom tuned and ported cabinet design for optimum tone • Speakers manufactured for EDEN exclusively in Kentucky USA by Eminence loudspeakers

**D410XST** • Available in both 8Ω and 4Ω impedance • 4 x10" speaker configuration • 1000W power handling capability • Cast Horn Driver and Bell Casing • Tweeter level control • USA manufactured Cabinetry • Durable Cabinet covering • Internal Cabinet bracing promotes superior tone quality and sound projection • Custom tuned and ported cabinet design for optimum tone • Speakers manufactured for EDEN exclusively in Kentucky USA by Eminence loudspeakers

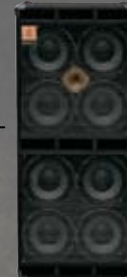

**D210XST** • Available in both 8Ω and 4Ω impedance • 2 x10" speaker configuration • 600W power handling capability • Cast Horn Driver and Bell Casing • Tweeter level control • USA manufactured Cabinetry • Durable Cabinet covering • Internal Cabinet bracing promotes superior tone quality and sound projection • Custom tuned and ported cabinet design for optimum tone • Speakers manufactured for EDEN exclusively in Kentucky USA by Eminence loudspeakers

**NEW! D212XST** • Available in both 8Ω and 4Ω impedance • 2 x12" speaker configuration • 600W power handling capability • Cast Horn Driver and Bell Casing • Tweeter level control • USA manufactured Cabinetry • Durable Cabinet covering • Internal Cabinet bracing promotes superior tone quality and sound projection • Custom tuned and ported cabinet design for optimum tone • Speakers manufactured for EDEN exclusively in Kentucky USA by Eminence loudspeakers

**NEW! D112XST** • 8Ω impedance • 1 x12" speaker configuration • 300W power handling capability • Cast Horn Driver and Bell Casing • Tweeter level control • USA manufactured Cabinetry • Durable Cabinet covering • Internal Cabinet bracing promotes superior tone quality and sound projection • Custom tuned and ported cabinet design for optimum tone • Speakers manufactured for EDEN exclusively in Kentucky USA by Eminence loudspeakers

**WTX500** • 500W at 4Ω (280W at 8Ω) • Ultra lightweight D-class power stage • Gain control (pull to engage -12 dB pad for high output / active bass instruments) • EDEN enhance control for added tone shaping (pull to bypass compressor) • Bass level control • Bass boost feature for added low end (pull Bass control knob to activate) • Mid level control • Mid Shift feature (pull mid level control to engage) • High level control • Pre / Post DI selector (choose where your Di signal comes from Pre or Post EQ) • Master control (overall power stage output) • Mute (mutes all outputs except tuner) • Effects loop • Stereo Auxiliary inputs • Tuner output • DI Recording out (balanced XLR) with Level control and ground lift • Headphone out • 2 x 1/4" Speaker Output Jacks and 1x Speakon Speaker Output Jack • Footswitch input • Foot switchable feature using optional EF2 foot controller, sold separately.

**WTX264** • 300W at 4Ω • Ultra lightweight D-class power stage • Gain control • EDEN enhance control for added tone shaping • Bass level control • Bass boost feature for added low end (pull Bass control knob to activate) • Mid level control • Mid Shift feature (pull mid level control to engage) • High level control • Master control (overall power stage output) • Mute (mutes all outputs except tuner) • Stereo Auxiliary inputs • Tuner output • DI Recording out (balanced XLR) with Level control and ground lift • Headphone out • 2 x 1/4" Speaker Output Jacks and 1 x Speakon Speaker Output Jack • Footswitch input • Foot switchable feature using optional EF2 foot controller, sold separately.

# SPECIFICATIONS

Page 15

**E300** • 300W bass amplifier • Gain control to adjust preamp signal level • EDEN enhance control for advanced tone shaping • Separate Bass, Middle and Treble controls • Master volume control • 1/4" (6.35mm) Auxiliary line input • Headphone output • 1/8" (3.5mm) Line input • Balanced XLR DI output • 1 x 1/4" (6.35mm) Speaker output • Compatible with 4Ω and 8Ω speaker cabinets (300W at 4Ω)

Page 16

**EX410** • Available in 4Ω impedance • 4 x 10" speaker configuration • 600W power handling capability • Built in tweeter horn • Tweeter level control • Durable Cabinet covering • Cabinet bracing for tone quality and sound projection • EDEN designed loudspeakers

Page 16

**EX410SC** • Available in 4Ω impedance • 4 x 10" speaker configuration • 400W power handling capability • Durable Cabinet covering • Cabinet bracing for tone quality and sound projection • EDEN designed extended range loudspeakers

Page 16

**NEW! EX210** • Available in 8Ω and 4Ω impedance • 2 x 10" speaker configuration • 300W power handling capability • Built in tweeter horn • Tweeter level control • Durable Cabinet covering • Cabinet bracing for tone quality and sound projection • EDEN designed loudspeakers

Page 17

**EX110** • Available in either 8Ω or 4Ω impedance • 1 x 10" configuration • 300W power handling capability • Durable Cabinet covering • Cabinet bracing for tone quality and sound projection • EDEN designed loudspeaker • Ported cabinet design for extended tone capabilities • Built in easy carry handle

Page 17

**EX112** • Available in either 8Ω or 4Ω impedance • 1 x 12" configuration • 300W power handling capability • Durable Cabinet covering • Cabinet bracing for tone quality and sound projection • EDEN designed loudspeaker • Ported cabinet design for extended tone capabilities • Built in easy carry handle

Page 17

**NEW! EX115** • Available in 8Ω impedance • 1 x 15" configuration • 300W power handling capability • Durable Cabinet covering • Cabinet bracing for tone quality and sound projection • EDEN designed loudspeaker • Ported cabinet design for extended tone capabilities

Page 18

**EM275** • RCA Tape / CD input on rear • 3 x separate instrument channels • 4 x separate instrument inputs • Channel 1 features 1/4" (6.35mm) jack socket input with separate Gain, Bass, Middle, Treble and Pan controls and channel level control • Channel 2 features 1/4" (6.35mm) jack socket input with separate Gain, Distortion, Bass, Middle, Treble and Pan controls and channel level control • Channel 3 features separate 1/4" (6.35mm) and 1/8" (3.5mm) and channel level control • Master volume control • 3 headphone outputs for silent play • Separate volume control per headphone output • 1/4" stereo Line output for recording / connection to mixing console • Kick-back cabinet design • 2 x 10" stereo speaker output • 150W (2x 75W) into internal speakers

Page 19

**EM15** • Line in feature • 2 x separate instrument inputs • Volume and tone controls for instrument 1 • Volume and tone controls for instrument 2 • 2 headphone outputs for silent play • Compact high quality output 8 inch speaker • 15W into internal speaker.

Page 19

**EM25** • 1/8" (3.5mm) Line in feature • RCA Tape / CD input on rear • 2 x separate instrument inputs • Separate gain control for each instrument input • Master EQ stage with treble, middle and bass control • Master volume control • 2 headphone outputs for silent play • Separate volume control per headphone output • 1/4" Line output for recording / connection to mixing console • Kick-back cabinet design • Compact high quality output 8 inch speaker • 25W into internal speaker
